Objective:

I'm looking for position

Junior FrontEnd developer (remote job)

With a strong technical skill-set, attention to detail, I want to work as a front-end web developer where I could create digital magic and elevate user experience to the next level.

Technical skills:

Design and develop web sites using **HTML**, **CSS** & **twitter Bootstrap** library , **Javascript**, and **jQuery** for interactivity. Know how to write code that gets W3C approval. Design sites that are responsive and functional, have a clean look, and provide clear and friendly navigation and easy accessibility. Validate usability on different browsers, and troubleshoot code where required. Also I use **Gulp** tusk-runner & **SASS** as CSS preprocessor. For slicing images to insert in web page I use **Photoshop**.
